

# CHILD DEVELOPMENT ASSIGNMENT 11/11/2014

I will check this first thing on Wednesday!!!

## Page 8: Self Feeding

- When did baby begin first start self-feeding
- How did you introduce new food
- Give 3 safety tips for self-feeding
- Favorite food
- Least Favorite food

Don't forget the page number and decoration!!

Example:

**How to: introduce new foods**

**When:**  
Donovan started eating at around 6-8 months

**How:**  
When me and my husband were eating dinner and donovan was drinking his bottle I wanted him to try something different so I tried giving him green beans so I overcooked them to make it softer and h enjoyed it very much he tried chewing but his teeth weren't grown in

**Safety tips:**  
I made sure he wasn't by his self just in case he started choking and when I gave him a little bit of sweet potatoes I made sure I mashed them up to like a liquid

**His least favorite food:**  
Donovan's least favorite food is peas giving him It mashed he threw it to more than once and when I tried the dissolve in his mouth all he did was so no more peas

**His favorite food:**  
Donovan's favorite food for right now is applesauce and he try's to feed him self but he makes a mess with it so I feed him my self
